

M. MELEK EROL TAYGUN

M. Melek Erol Taygun is Professor in the department of Chemical Engineering at Istanbul Technical University. She received her BSc (1996), MSc. (1999) and PhD (2006) from Istanbul Technical University. After a postdoc career at Imperial College, in UK., she has started to study on the nanocomposite materials for tissue engineering applications. Her postdoctoral research focussed on the development of composite scaffolds for tissue engineering applications. She is author or co-author of 2 book chapters, over 39 publications in various international journals, which have received more than 1000 citations and about 33 international conference papers (abstracts, proceedings).
